

IN THE SPECIFICATION

Please amend the specification as follows:

Paragraph beginning at page 29, line 1, is amended as follows

Q1 The analysis means 9 analyzes the protocol stored in the storage means 6 to pick out the protocol line related to the vessel selected by the selection means 9 5. The picked-out line may be displayed on the protocol display screen 42 or outputted to an output device (not shown). Incidentally, the commands displayed on the protocol display screen 42 can be corrected and altered by the input means 10 and the protocol creation means 7.
